

Products: LMA5-1101, LMA5-6101, LMH5-1101, LMH5-6101 Series

Please be informed that the PCB material of the models above mentioned will be changed for the product stabilization. Your understanding and cooperation would be appreciated.

- * The PCB material will be changed from the paper-phenol to the glass-epoxy.
- * The bonding method among PCB and tags will be changed from the adhesive bonding by the conductive paste and the resin adhesive to the solder bonding.
- * There is no change in the electrical or mechanical specification.
- * No problem with the same usage as previous.

Implementation schedule;

Sequentially carried out from March 21st, 2017

- There is no mixed-up in the same order lot.
- The implementation will be rescheduled depending on the inventory status.
- The new production of the former PCB is acceptable until June 20th, 2017 - to be discussed separately.
