

Products: MF-9101 series, MF-914, CPA-9000 series and LMH5 series

Please be informed that the material for the Control-bar shafts on the models mentioned above will be changed due to the supplier's circumstances.

- * The material will be changed from Electro galvanized zinc plated steel to SPCC with nickel plating.
- * There is no change in the electrical or the mechanical specification.
- * No problem with the same usage as previous.

Implementation schedule;

Sequentially carried out from April 21st, 2018

There is no mixed-up in the same order lot.

The implementation will be rescheduled depending on the inventory status.
For the new production for the T-bar shafts in former material after the implementation, please contact us separately.
